Dear Madam: :

Extreme ineptness by USPTO requires extreme corrective measure.

Everything in an 'abandonment' notification we received two days ago is incorrect and completely without foundation. How our work could be treated in such a manner after nearly five [5] years of continued attention to all details to make sure this 'worst case scenario' could not possibly occur is totally incomprehensible.

Nothing was late; all was received in more than a timely manner. It was USPTO [John Layck] that lost our timely return of corrected claims and then found them 6 months later and then only after we had called to inquire to our concern. The whole history of this folly is recorded both on the patent PAIRS site and elsewhere. I personally reminded and warned Mr. Lacyk, both by phone and by fax at least a dozen times to be sure and not forget what really, actually happened and don't just put 'late' in the files not knowing the details of what you were talking about. He concurred at least a dozen times and then went ahead and made this horrible mistakes.

Directly related to USPTO multiple errors , we have lost over the past five [5] years three million eight hundred thousand dollars [\$3,800,000]. We have gone from a staff of 38 scientists and support personnel to 4 scientists and no support personnel and are now on the edge of bankruptcy.

We are beginning communication by phone, fax, email and in person with - Commerce Committee Chairman **Ted Stevens**, US Congressman **Ciro D. Rodriguez**, US Senator **Kay Bailey Hutchison**, Patent Commissioner **John Doll**, Deputy Patent Commission **John Love** and your senior patent attorneys. We need to stop this 'abandonment' designation in its tracks and redirect to near approval where it was before this ludicrous happening.

This type of travesty simply cannot be allowed. Thank you so much for your time and attention.

Bill
